

WHAT IS CLAIMED IS :

1. Eyeglass frames with hidden magnetic attachment  
structutre comprising :

5 a primary eyeglass frame being provided with a groove in  
the specific bottom portion, the bridge or each hinge, at  
least one magnetic article being provided in each said  
groove, a pad being provided at the bottom of each said  
magnetic article; and,

10 an auxiliary eyeglass frame being provided with a reverse  
U-shaped block at the specific portion, the bridge or each  
end, at least one magnetic article being provided in each  
leg portion of said reverse U-shaped block.

2. The eyeglass frames with hidden magnetic  
attachment structutre as recited in claim 1, wherein said  
15 magnetic articles in each said groove or each said leg  
portion of each said reverse U-shaped block may be made  
of material that can be attracted.

3. The eyeglass frames with hidden magnetic  
attachment structutre as recited in claim 1, wherein the  
20 north and south poles of each said magnetic article are in  
horizontal direction at the best.

4. The eyeglass frames with hidden magnetic  
attachment structutre as recited in claim 1, wherein each  
said pad is made of iron at the best.

25 5. The eyeglass frames with hidden magnetic

attachment structure as recited in claim 1, wherein each  
said magnetic article has strong magnetic attraction at the  
best.
